Data Sheet for Setting-up Sample

BS SU LAS13-1

Setting-up Sample for Low Alloy Steel

Estimated
Analysis¹

Estimated
Analysis¹

Analysis listed as percent by weight

Al	0.275	Ni	0.150
As	0.034	O	<0.05
B	0.0062	P	0.071
C	0.094	Pb	0.0013
Ca	0.0002	S	0.0008
Co	0.202	Sb	<0.05
Cr	1.31	Si	0.13
Cu	0.427	Sn	0.059
Fe	[94.0]	Ta	0.046
Mg	0.0003	Ti	0.105
Mn	1.72	V	0.388
Mo	0.80	W	0.108
N	0.0027	Zn	<0.0030
Nb	0.113	Zr	0.027

¹ The above chemistry is supplied as an approximate guide to the composition of this setup sample and must not be regarded as a certified analysis. The analysis is based on the results of the homogeneity testing performed on the sample lot. This sample was found to be suitable for use as a setting-up sample and may be used for instrument drift control. It must not be used for instrument calibration.

The requirements of ISO Guides 31, 34, and 35 were followed for the preparation of this setting-up sample and data sheet.

Homogeneity: This setting-up sample (SUS) was tested for homogeneity using ASTM Standard Method E 826 and found acceptable. It was also examined by spark atomic emission spectrometry and found to be compatible with the following Reference Materials — 501-676, 501-991, 502-416; BAS 430/1, 451/1; BS 40B, 42A, 68E, 3972, HON-T, LAS-7, LE 204; CMSI 2072, 2074; ECRM 096-1, 187-1D, 284-1, 285-1, 299-1; KMS LCSON-001; NCS NS11028; SRM 1263A, 2171.

Data Sheet Number SU LAS13-1-121014 Page 1/3

Validity statement: ISO Guide 31 states that the data sheet should contain an expiration date for all samples where instability has been demonstrated or is considered possible, after which the stated values are no longer guaranteed by the producing body. The stated values for BS SU LAS13-1 are valid indefinitely. However, they are nullified if this SUS is damaged, contaminated, or otherwise modified.

Source: The stock for this SUS was produced by Ulrich Nell, Oberhausen, Germany.

Form: This SUS is machined in the form of a disc, approximately 40 mm in diameter and 40 mm thick by Brammer Standard Company, Inc.

Use: This SUS is intended for use in spark atomic emission and x-ray spectrometric methods of analysis. Refer to ISO Guide 33 for information about the use of setting-up samples. It is intended as a setup standard to be used for controlling instrument drift.

Analytical Area: The entire depth of the SUS may be used.

Sample Preparation: For best analytical results, use the same method for preparing the analytical surface on all setting-up samples as you use for production specimens. Avoid overheating the sample during surface preparation.

Data Sheet Number: The unique identification number for this data sheet is SU LAS13-1-121014. You may obtain information on revisions of data sheets from the internet at www.brammerstandard.com.

Safety Notice: A Material Safety Data Sheet (MSDS) is not required for this sample. This sample will not release or otherwise result in exposure to a hazardous chemical, under normal conditions of use. Inquiries concerning this setting-up sample should be directed to:

Brammer Standard Co., Inc. 14603 Benfer Road Houston, Texas 77069-2895 USA	Phone: (281) 440-9396	Web: www.brammerstandard.com
